

(2)

Make a table of values:

time(h)	distance(miles)
0.5	25
1	50
1.5	75
2	100
2.5	125
3	150

When you describe a pattern, tell what it relates to, where it starts, and how it changes:

A linear relation is a pattern made by a set of points that lie in a straight line.

This shows the relationship between time and distance. So, at 0min, you have gone 0 km. For every 100min, you go 300 km. At 500min you have gone 1500 km.
