## Math 8 - Try This!

9.2 Patterns in a Table of Values

1. What are the 3 patterns you see in the design above?
2. How many squares and triangles are in this design?
3. If this design has ten sections, what does one section of the design look like?
4. Fill in the table of values:

| Number <br> of <br> sections | Number of <br> vertical <br> segments | Number of <br> horizontal <br> segments | Number of <br> slanting <br> segments |
| :---: | :--- | :--- | :--- |
| 1 |  |  |  |
| 2 |  |  |  |
| 3 |  |  |  |
| 5 |  |  |  |

5. a) Describe the relationship between the number of sections and the number of vertical segments.
b) Choose variables to represent the number of sections and the number of vertical segments.
c) What is an expression for the number of sections in term of the vertical segments?
c) Draw a graph to show the relationship between the number of sections and the number of vertical segments.
